

## Workshop on advanced materials begins at NITK

A five-day workshop on advanced materials and characterisation techniques, organised by the Central Research Facility (CRF), began at the National Institute of Technology - Karnataka in Surathkal on Monday. According to Sathanarayanan, professor and chairman, CRF, 50 candidates are participating in the workshop to get a hands-on experience in advanced characterisation techniques. The equipment at the CRF is accessible for researchers across the country and abroad. The facility has its own website for getting access to the equipment at the CRF.
